**SIZE SELECTION**

It is important to note that every manufacturer's size scale varies a little. The charts listed in our catalog correspond to the way our merchandise fits. Sometimes members will end up being a different size in our apparel than what they normally buy in the store. We know that most people are hesitant about selecting a size from our chart that is larger than what they normally wear. However, we do recommend looking at your size chart on our site chart instead of what you might wear in another brand.

For most laden garments, it is easiest to start by locating the bust and waist measurements on the size chart. For bust and waist measurements, the chart lists the maximum recommended measurement for that size. For our customer service representatives give you more specific information on how to select sizes.

It is common for people to fall between sizes. Here is an example of a garment that is not exactly chart proportionate, but can select a size with a little compromise. Her measurements: bust 33 1/2”, waist 29”, hips 40”. Skirt length 28”. The dress she is measuring references size chart B. Notice that her bust and hips are between a size 6 and 8. Since her bust and hips measure in the size 10 range, and her waist is in the size 8 range, we will order a size 10 for knowing that her dress can be altered at the waist for a more exact fit. All of our pants and formal dresses are shipped with attached length as listed and accommodate most members and will require hemming. Talls are available with an additional 3\(\frac{1}{4}\)" length for $15. Size will fit only up to 1" over chart measurements.
